# SARGUNAN C

**Junior AI Engineer**

+91 63747 53452 | csargunan04@gmail.com | LinkedIn | Portfolio | GitHub

## SUMMARY

B.Tech graduate focused on Applied Generative AI, building practical LLM applications, RAG pipelines, and AI automation workflows. Experienced with Python, LLM APIs, embeddings, vector search, semantic retrieval, structured data extraction, REST APIs, and n8n automation.

## EXPERIENCE

**AI & Automation Intern — InnerWhispers** Sep 2026 – Present

*Remote*

- Contributing to AI and automation initiatives, supporting assigned product and development workflows.
- Supporting front-end and other development tasks across ongoing projects using web and AI technologies.
- Applying AI frameworks and automation tools to assigned development requirements.
- Participating in development, testing, debugging, and project reviews to improve assigned solutions.

## PROJECTS

**RAG-Powered Component Specification Assistant** GitHub

- Built a retrieval-augmented generation (RAG) application that grounds LLM responses in a dedicated knowledge source using embeddings and vector search.
- Designed a semantic retrieval pipeline using document embeddings and vector search to retrieve relevant domain-specific context.
- Integrated retrieval and generation stages with n8n to pass relevant context to the LLM before response generation.

**AI-Powered Supply Chain RFQ & Email Parser** GitHub

- Automated supplier RFQ email ingestion using IMAP monitoring and n8n workflow orchestration.
- Integrated Groq LLM processing to extract supplier, product, quantity, delivery date, price, currency, and other RFQ fields into structured JSON.
- Validated extracted JSON and automated structured RFQ storage in Google Sheets for downstream use.

**3D AI Engineer Personal Portfolio**

- Designed and built an interactive 3D portfolio using React, TypeScript, and React Three Fiber to showcase GenAI projects.
- Implemented responsive 3D interfaces with smooth animations and transitions using Framer Motion.

## EDUCATION

**B.Tech – Electronics & Communication Engineering** 2022 – 2026

*SASTRA Deemed University*

## TECHNICAL SKILLS

**Languages & Frontend:** Python | JavaScript | TypeScript | SQL | React | Three.js | React Three Fiber | Framer Motion

**AI & Automation:** LLM APIs | Groq | RAG | Embeddings | Vector Search | Semantic Search | Prompt Engineering | n8n | REST APIs | IMAP | JSON | Structured Outputs

**Development Tools:** Git | GitHub

## CERTIFICATIONS

Career Essentials in Generative AI — Microsoft & LinkedIn | 2026 View Certificate

AI and Neural Networks — SASTRA Deemed University
